

## **The App:**

Hapzz is a free social networking app, that lets you connect with people and events near you **that are happening right now**. It's all about living in the present, sharing news and helping each other in the neighborhood.

You can ask anyone **within 800 meters** of you for advice or even give your own tips. View and upload photos or videos (**which will be deleted automatically after 1 hour**), to share the most current information with people close-by.

Our objective is to help connect users who are around you at this very moment. We want to promote the idea of living in the present. For instance, if you're looking to carpool, get some information on the morning traffic or get help from someone, you can just send a message out on Hapzz. This location-based app is the perfect way to make new friends with those in your community.

## **FEATURES**

- Find out what's going around you within 800m. You can search for people, restaurants, activities, services, shops, events - anything that's happening right now and right where you are.
- Instant chat with the people around you
- Anonymous identity - there's no need to sign in! Get chatting right away
- Ask for advice or add your own tips
- Upload and view photos: photos will be deleted automatically after 1 hour

Don't wait, live in the here and now with Hapzz. Enjoy the moment!

## **The Founders:**

Hapzz's creators Francis Liu and Paul Mak are both located in Hong Kong and raised in Canada. Francis, who is from the banking and real estate industry, is in charge of the business and marketing aspects for the app. Paul has a strong background in designing and developing digital content. They hope this app can improve people's happiness by promoting the theory of living in the present.
